CHIROPRACTIC ADJUSTMENTS

95%

Of infants have
misalignments
after birth

Chiropractic is shown to relax
muscular tension, improve sleep, can
reduce colic symptoms, and can
improve breastfeeding outcomes in
newborns.

Call today to bring your baby in for a free exam and adjustment.

217-357-2133

Reflux and colic symptoms
showed significant improvement
within a three week period of
chiropractic care.

- JOURNAL OF PEDIATRIC, MATERNAL
& FAMILY HEALTH - CHIROPRACTIC
